

Ligence Heart

AI-driven application which automatically evaluates heart ultrasound images

AUTOMATED

- More time can be spent on doctor-patient communication
- Provides full spectrum of measurements
- Reduced intra-rater variability

ANALYSIS

- Automatically generated report in a local language
- Images are analysed directly after they are taken
- Measurements can be adjusted by demand

IN TANDEM WITH AI

- AI independently mimics the steps performed by a specialist
- Accuracy non inferior to a cardiologist*
